ENTERPRISE DIGITAL BANKING SYSTEM

00

Documentation Index

Start here - what each document in the complete documentation set covers, and the system at a glance.

Document	00 — Documentation Index
System	Enterprise Digital Banking System (banking-app) + notification-service
Stack	Java 17 · Spring Boot 4.1 · Spring Security + JWT · Spring Data JPA · MySQL 8 · Apache Kafka 3.8 · Redis 7 · Docker
Repository	Enterprise-Digital-Banking-System (branch `master`)
Version / date	1.0 — 13 October 2026
Author	hemantwint-hey

Status tags used throughout: **BUILT** exists in the code today **PLANNED** part of the target design (roadmap docs 01–09), not yet implemented **GAP** known limitation

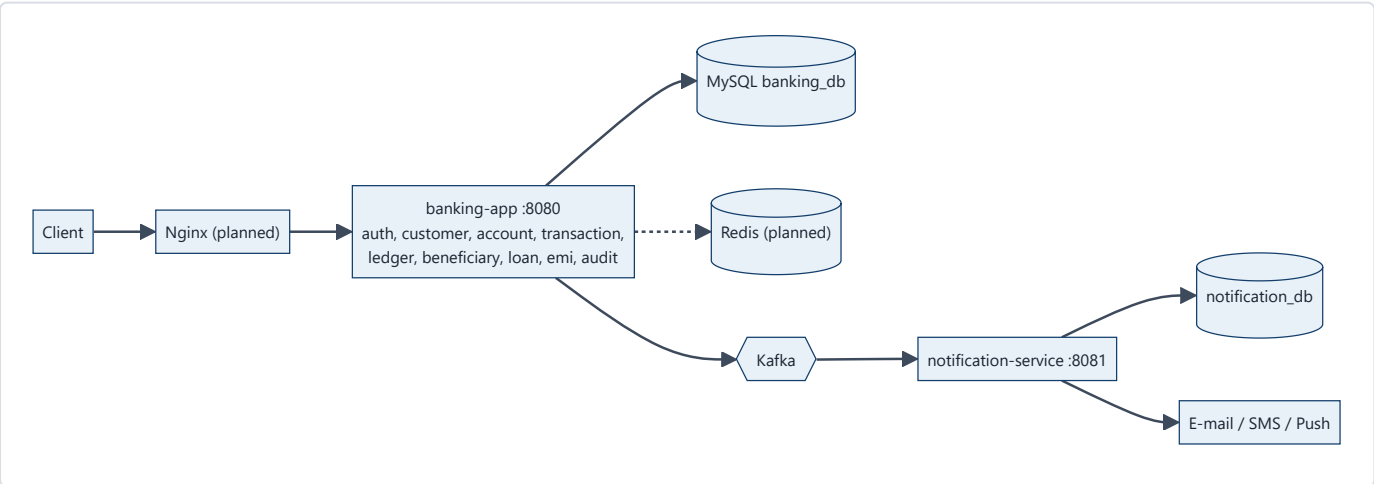

The Documentation Set

#	File	Contents
01	`01-Architecture-Documentation.pdf`	System overview and actors, system architecture diagram, layered architecture, component diagram, Kafka integration, deployment architecture (Docker Compose, AWS), technology choices, 12 ADRs, quality attributes
02	`02-Database-Documentation.pdf`	ER diagram, relational schema (DDL), data dictionary for every column, enumerations, constraints, indexes, migration history and Flyway plan, retention
03	`03-Flow-and-Interaction-Diagrams.pdf`	DFD levels 0/1/2, sequence diagrams (register, login, JWT filter, transfer, deposit/withdraw, beneficiary + notification, loan, EMI), activity diagrams, state diagrams for account, loan, EMI, beneficiary, KYC, notification
04	`04-API-Documentation.pdf`	Conventions, authentication, every endpoint with request/response examples, Kafka event contracts, error body, status codes, error catalogue, OpenAPI/Swagger setup, cURL quick start
05	`05-Security-Documentation.pdf`	Security architecture, authentication flow and token format, password policy, authorization matrix, sensitive data, STRIDE threat model, secrets management, audit policy, review checklist
06	`06-Testing-Documentation.pdf`	Current test status, strategy and pyramid, test plan, existing and planned test cases, integration and API tests, coverage, performance testing
07	`07-Deployment-and-Operations.pdf`	Environments, local run, Dockerfile, docker-compose, configuration and profiles, CI/CD pipeline, AWS deployment, logging, monitoring, backup and recovery, troubleshooting runbook
08	`08-Project-and-Maintenance.pdf`	Project overview, functional and non-functional requirements, business rules, developer setup guide, conventions, known limitations, roadmap, changelog, how to maintain these docs

Status tags

The documents describe the **target system** (after roadmap items 01–09) and mark every item: **BUILT** in the code today · **PLANNED** designed, not yet implemented · **GAP** known limitation.

System at a glance

Suggested reading order

1. New developer: 08 → 01 → 02 → 03 → 04.
2. API consumer / frontend: 04 → 05 (section 2).
3. Reviewer / interviewer: 01 (ADRs) → 03 (transfer flow) → 05 (threat model).
4. Operator: 07.
